<sup>1</sup> Breakdowns by innovation exclude 32 cases, representing 1,100 companies, in which innovator status could not be determined. To be classified as an innovator, the company had to indicate that it had developed a product or process in the past 12 months or believed it would develop a product or process in the next 12 months as a result of IT-based innovation. The survey was conducted during the period July 2001–April 2002.

**KEY:** IT=information technology; AAB=accounting, auditing, bookkeeping; S=suppressed for reasons of reliability due to receiving less than 20 responses

**NOTES:** Responses are to question 7d: "On a scale of 1 to 10, where 1 is not at all important and 10 is extremely important, please rate the importance of IT goods and services for attracting investment capital?"

The category "No or little importance" represents a response of 1, 2, or 3 to this question. The category "Moderate importance" represents a response of 4, 5, 6, or 7 to this question. The category "Great importance" represents a response of 8, 9, or 10 to this question. Total nonresponse consists of item nonresponse and don't know responses. Percentages are based on unrounded frequencies and may not total 100 due to rounding.

IT is defined as the hardware and software that support the production or use of computer-based information systems, the infrastructure necessary to access such information systems, or data processing services.
